

WINDMILL SCRAP AND RECYCLE SERVICE

International Company Limited, Thailand

Disposal waste
service provider

“Transform your waste into
renewable energy without landfill”

Tax ID: 0205561005942

About Us

Windmill Scrap and Recycle Service International Co., Ltd. has been a leading provider of environmentally friendly services to industrial and commercial customers for the past seven years. We have a solid foothold as a provider of waste management services. We offer various types of waste, innovative reuse services, and advanced recycling on an industrial scale. We also provide comprehensive recycling solutions, essential for shifting to a circular economy.

Mission

To make the world greener, we are committed to collecting disposal waste from door to door in every possible location. Our responsibility is to provide ecologically friendly services for collecting your waste and converting it into zero waste without using landfills through incineration. Our business concept involves converting your waste into a zero landfill by burning it in a cement kiln.

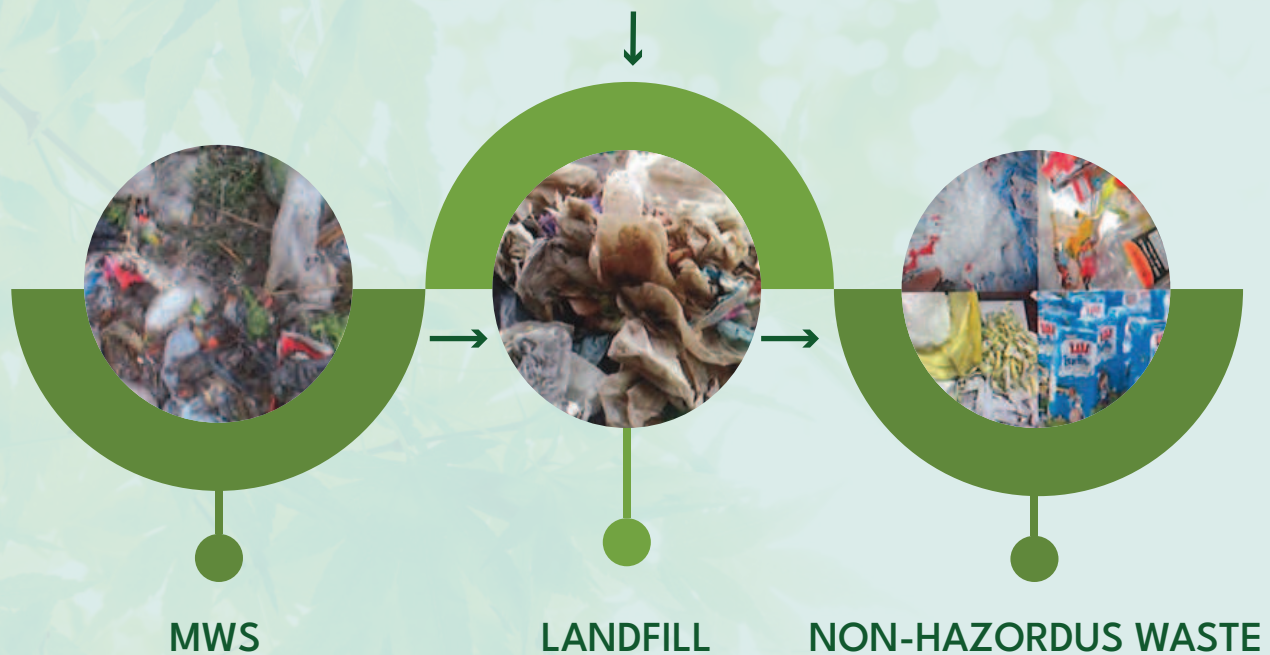

Vision

To inspire devotion through innovation and proper scientific advancement, our company offers solid waste disposal services using a cement kiln and the incineration process to convert waste into renewable energy. Our unwavering goal is to transform all waste into zero waste to protect the environment and educate future generations about energy conservation.
